

- Green

LATIN NAMES: aeruginosus, aquamarinus, atrovirens, berylinus, chlorascens, chloro-, flavovirens, glaucescens, glaucus, melanochlorus, nigro-virens, olivaceus, orobitinus, prasinus, psittaceus, smaragdinus, thalassicus, venetus, viridis, sempervirens

EFFECTS:

- calming influence on other colors, midway on light spectrum
- peace and renewal, relaxes emotions + mind
- hindus say imagining green brings emotional balance/empathy to life, reduces anxiety
  
- use in east and southeast locations
- neutral background
- contrasts with red
- harmonizes most closely with yellow + blue
- mid-greens most neutral-border between hot/cold colors + dark/light tones
- chartreuse green can be considered both cool or hot color depending on neighbors
- great transitions between other colors, a “green interlude” garden, pause that refreshes

- use variegated foliage for shady areas to add light and shimmer pick up color in variegated foliage with similar flower colors adjacent
  
- prevents color clutter
- great for arbors, benches, fencing, furniture, containers==makes colors pop, ties in disparate elements
- in deep shade , use many different greens for contrast, chartreuse, yellow, variegated green-white, or yellow-white
- green makes shady places feel cool, fresh
- dark green foliage provides depth, acts as foil or light/bright colors -yellow, scarlet, white
- yellow greens-energizing, zesty feel
- velvety sage greens with warm contrasts go well with pale yellows, pinks, mauves

Great picture to see contrast between painted + unpainted fence
