

## RAISED BEDS:

- minimum 12' , no deeper than 31" depth
- improves drainage
- great to use drip irrigation
- easy to weed, plant, harvest
  
- materials: wood, stock tanks, metal roofing material, corten steel, concrete blocks, tree branches/logs, straw bales, file cabinets, rain barrels cut in half, wheel barrels, kids pools, milk crates, galvanized trash cans
  
- waist high beds easiest of all, use concrete shallow mixing pan for raised bed, cover tall legs of stand with attractive wood slats or corrugated metal and store dirt, garden equipment under raised beds
  
- dress them up and think beyond plopping them in middle of yard—put in u-shape, L-shape to create dining space or place for fountain
- attach seating board
- create beauty with designed space
