

---

## WATER FEATURES:

- *make as big as space permits*
- *needs to be well placed*
- *should provide a full visual stop*
- *lighting it at night is fantastic, small underwater spotlights, opposite corners, water droplets like jewels*
- *many small lights better than few large (think of lighting a room)*
- *uplighting makes a silhouette against night sky*
- *best when positioned in full sun with shade background*
- *use darkest pool material-emphasizes water better, brings out depth, hides pump*
- *make at least 18" deep if not more*
- *use circuit breaker for safety*
- *splashing fountains make negative ions that when inhaled increase serotonin levels*
- *reduce stress, fatigue, and anxiety*
- *can act as focal point*
- *dark liner (gray, black) the water reflects the sky, makes water look deeper*
- *if painted turquoise blue, the pool and sky seem to merge together*
- *both ways are very attractive*
- *hides noise*
- *brings in wildlife*
- *adds movement*
